

GREENBELT
PROJECTS

ABOUT US

Based in Umdloti Beach, Durban, KZN, South Africa, Greenbelt Projects (Pty) Ltd is an environmental consultancy providing all-inclusive environmental management services with a practice of excellence, integrity and innovation in environmental management, which facilitates the implementation of sustainable projects for our clients. Through our involvement from project inception, construction phase through to operational phase, our approach balances the needs of the environment and development objectives within the various regulatory frameworks.

PERSONNEL

Steven Whitaker, Director and Principal Environmental Consultant, has obtained an undergraduate BSc degree in Geography and Environmental Management, and a postgraduate BSc Honours degree in Environmental Management, certificates in ESRI Geographic Information Systems (mapping) and extensive Environmental Impact Assessment training. Steven has gained over 13 years of work experience in the environmental industry and has successfully completed and managed a variety of environmental management related projects. Well versed in Environmental Impact Assessments, Basic Assessments, Water Use Licencing, Environmental Monitoring, Waste Management, Mining Industry Applications, Environmental Management Programmes and Geographic Information Systems (mapping), Steven has built up a sound working knowledge in the environmental field and respective regulatory frameworks. Steven prescribes to the International Association for Impact Assessment South Africa (IAIASa).
